

THINK GLOBALLY. PLANT LOCALLY.

Local Branch is a web application that helps environmental Californian home-owners save water by planting native plants.

CHOOSE YOUR LOCATION

Local Branch helps people plant native plants. By finding out what plants are native to their county, gardeners can help to save water.

BROWSE PLANTS

Explore all of the plants native to your area so that you can find plants that save water and look great in your garden. Browse by type of plant to quickly find exactly what you're looking for.

LEARN MORE

Learn more about specific plants to see if they're right for you. Add plants to your list so that you can remember them later.
